Message from President of Fed. MES

Federation of Myanmar Engineering Societies was originally formed in 1916 as "The Burma Engineering Congress". In 1927, the name was changed to "The Association of Engineers in Burma". Due to the out-break of World War II, the activities cooled down during the period 1939- 1945 and resumed its regular activities in 1946. Due to a Government Act abolishing all parties and associations, the Association of Engineers in Burma, like all other associations, were abolished in 1963.

In order to be able to serve its Mother Land in much-needed infrastructures for development, economy and Urbanization, "The Association of Engineers in Burma" was restructured in 1995 giving birth to "Myanmar Engineering Society (MES)".

In order to expand the activities and coverage of MES, the name "Myanmar Engineering Society - MES" has been changed to "Federation of Myanmar Engineering Societies – Fed. MES" by the arrangement and approval of Annual General Meeting held on 19th January, 2019 at MES. There are more than 70 Committees and Technical Divisions which are established to implement the work programs laid down by Central Committee of Fed. MES and the Myanmar International Consulting Engineers Group, "MICEG" is one of them.

MICEG was formed on 26th April, 2014 as an umbrella organization under the Myanmar Engineering Society (MES) with four objectives. One of which is to enhance the sustainable development of MES.

MICEG was initially registered at the Ministry of Home Affairs as a professional service organization on 30th January 2015. And then, in order to comply with its work plans and activities, registration of MICEG has been moved to Directorate of Investment and Company Administration (DICA) since 1st June 2020. The principal mission of MICEG is to assure the safety of the public and a commitment to all engineering ethics in our practice is the core value of MICEG. Our experiences, combined with our commitment to the engineering ethics, will be applied to guarantee the better quality of Engineering Works and Safety of the People.

If you look around in your neighborhood, most of the things you will see are buildings and

entities built or constructed by Engineers. The development of a society largely depends on the ability of engineers which can make things better with quality engineering services and works. However, for the past few decades Myanmar People seemed to have felt that they had been receiving only low quality products of engineering services and works.

Construction Industry in Myanmar is growing rapidly over the years, and many construction companies have been established since the country's policy changed to market-oriented economy. To provide better quality works, MICEG can support to the construction projects with key services: to check the quality of construction materials, to evaluate whether the construction methods applied are in accordance with engineering ethics, and to recommend revisions to meet quality standards.

By the end of 2023, there are 1265 MICEG members in 20 chapters all over the country. Among them, there are 168 PEs, 3 SLAs, 452 RSEs as senior and junior consultants who are participating in Project Implementation Groups (PIG) of MICEG.

Since 2010, Myanmar Engineering Society has worked together with UN Habitat and Ministry of Construction for the development of Myanmar National Building Code (MNBC). MNBC 2012 has been introduced provisionally and then regularly updated till MNBC 2020. Now the Ministry of Construction instructed companies and engineers to refer MNBC 2020 in all design aspects in construction starting from 1st November 2020. MICEG is also going to contribute as a third-party consultancy for QA/QC in line with MNBC.

Fed. MES became a member of ASEAN Federation of Engineering Societies (AFEO) in 2000 and became a National member of Federation of Engineering Institutions from Asia and the Pacific (FEIAP) in 2008, then transferred the national membership to Myanmar Engineering Council (MEngC) in 2016 and applied again for associate member in 2018 and approved by FEIAP Exco in 2019. Fed. MES also is the Associate Member of World Federation of Engineering Organization (WFEO) in 2018 and then promoted to Affiliate Member status in 2021. It also joined the Federation of Engineering Institutions from South and Central Asia (FEISCA) recently in 2023. Fed. MES is actively participating in the activities of AFEO, FEIAP, and WFEO.

Moreover that, Fed. MES, its umbrella organizations and committees are coordinating with international organizations. Therefore, we are the member of Asian Academy of Engineering and Technology (AAET), Asia Civil Engineering Coordinating Council (ACECC), Federation of ASEAN Consulting Engineers (FACE) in 2019, International Association of Earth Quake Engineering (IAEE), Asia Welding Federation (AWF), International Tunnelling Association (ITA), Eastern Asia Society for Transportation Studies (EASTS) and ASAEN Quantity Surveyors Association (AQSA) etc.

As MICEG became a member of Federation of ASEAN Consulting Engineers (FACE) in 2019, MICEG needs to corporate with FACE and participate in the activities of FACE.

I believe that MICEG will continue supporting the national development and human resource development through the provisions of quality engineering and consultancy services. Moreover, it will continue to enhance the sustainable development of Federation of Myanmar Engineering Societies (Fed. MES).

Aung Myint President of Fed. MES

VISION

The most reliable, responsible and efficient engineering and consultancy services organization for safety of the people.

Mission

To serve as the Competent Professional Engineers by abiding the Engineering Ethics and safety of the people.

VALUE

Engineering Ethics is core value of MICEG.

OBJECTIVES

- 1. To support the national development through the provision of engineering and other consultancy services
- 2. To promote the human resource development through the provision of engineering and other consultancy services
- 3. To cooperate with local, regional and international engineering and consultancy organizations
- 4. To enhance the sustainable development of Federation of Myanmar Engineering Societies (Fed.MES)

ABOUT US

Myanmar International Consulting Engineers Group Incorporated was founded on 26th April, 2014 and preliminary registered on 30th January, 2015 and registered on 8th April, 2016 at the Union Registration Board. And then we have registered at Directorate of Investment and Company Administration (DICA) on 1st June, 2020.

MICEG was given the certificate of recognition as non-profit organization by Department of Revenue, Ministry of Planning and Finance on May 31, 2022.

MICEG is a body under the umbrella of Federation of Myanmar Engineering Societies (Fed.MES) and it is established to provide technical services to implement engineering works, and expertise to local firms as well as international firms from the initial stage of project planning up to the completion of the project. MICEG cooperates with Fed.MES in project planning, men power planning, and implementation of the project.

SERVICES PERFORMED

Consultancy services in the field of architecture, civil, electrical, mechanical, mining, chemical, water resources, water and sanitation, energy and renewable energy, urban development, transportation networks and others.

KEY CONSULTING TEAM

Senior Professional Engineers with min 25 years experienced in their various fields of expertise supported by mid-level engineers and specialist staff.

BOARD OF DIRECTORS

Central Committee 35 Members (elected every two years)

Central Executive Committee 21 Members (elected from 35 CC)

Board of Directors 12 Persons (elected from 21 CEC)

Part Time Directors 7 Persons (from States/ Regions Chapters)

Chairman 1 person Vice Chairman 2 persons General Secretary 1 person Joint General Secretary 2 persons Treasurer 1 person Joint Treasurer 1 person Auditor 1 person Joint Auditor 1 person **Publicist** 1 person Joint Publicist 1 person Director 12 persons **Part Time Director** 7 persons
